

# Cyclospotter II

HIGH CONTRAST-  
FAST & EFFICIENT

Online Quality Control of Automated  
Adhesive- & Sealant Application

- RGB-LEDs with free colour setting for perfect contrast

- Fast online-control during application

- Compact Design

**VisionTools**  
Bildanalyse Systeme GmbH

## 30 YEARS OF COMPETENCE

VisionTools is one of the leading system suppliers for industrial image analysing systems - since 1986. The powerful and efficient image analysing software V60 works perfectly together with systems of all branches of industrial product engineering.

# Cyclospotter II

- **3 CCD-sensor heads**
- **Data transfer:** Gigabit-Ethernet
- **Lighting:** 54 RGB-LEDs
- **Power supply:** 24V DC for RGB-LEDs
- **Ethernet connection:** M12 plug connector
- **Trigger connection:** M12 sensor connector with 24V-input directly of dispenser or robot

- **Appliance speed:** up to 500 mm/s
  - **Working distance:** 125 mm
  - **Nozzle diameter:** up to 38 mm
- Connection to any common dosing system or adhesive application equipment possible.

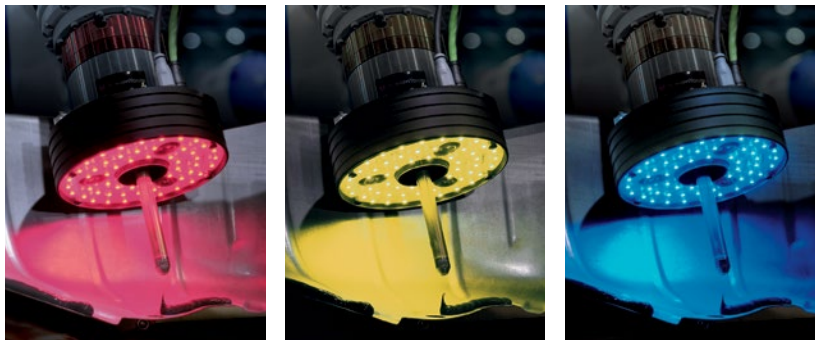

powered by

**V60**

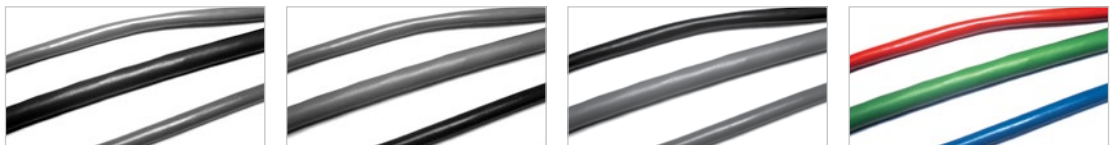

The image analysing software V60 ensures highest process reliability for online-control of adhesive and sealant applications.

A perfect contrast can be achieved for every applied material through freely-configurable colour of the **LED-lights**.

See following complementary colour examples.

VisionTools V60 means experience, consistent development and successful application of more than thousands of installed systems.
